

v0.31 Submission Preview Pack Manifest

2026-05-22

Pack

`eait_submission_pack_v0_31_20260522.zip` is a flat submission-preview package. It contains only the v0.31 manuscript source and preview artifacts listed below; it does not nest earlier submission packs or historical manuscript versions.

Included Files

file type	file
manuscript source	v0.31 $\text{\LaTeX}$ manuscript
manuscript preview	v0.31 PDF
Word preview	v0.31 DOCX
bibliography output	v0.31 .bbl
bibliography source	v0.31 keep-only .bib
layout audit	v0.31 layout-check audit $\text{\LaTeX}$ and PDF
Word export audit	v0.31 Word-export audit $\text{\LaTeX}$ and PDF
pack manifest	this manifest

Excluded Materials

The pack excludes old v0.1–v0.30 drafts, old zip packs, intermediate build logs, private coach workbooks, raw student text, complete student code, complete AIChat responses, identity fields, hash salts, reversible mappings, local private folders, screenshots, and ad hoc run outputs.

Evidence Boundary

The pack is a manuscript-delivery artifact only. It does not alter the original dialogue-state v3 evidence package, the 31-case primary scaffold result, the expanded v2 closeout numbers, any tutoring design, any prompt, any online AIChat behavior, or any student-visible response.

Remaining Human Checks

Before formal submission, the authors still need to complete author metadata, declarations, journal template conversion, institutional ethics/privacy/data-availability wording, final reference verification, and full Word/PDF visual inspection of the manuscript and Appendix A tables.
